

FORTIFY DEFENSES WITH BEACON® FEED ADDITIVE

Creating the optimal diet for your flock requires a precise, fine-tuned approach. Beacon® feed additive is a research-proven blend of ingredients formulated to support bird health and performance.

3 THINGS TO KNOW ABOUT BEACON® FEED ADDITIVE

- ▲ Multi-component solution
 - ▲ Supports gut integrity and performance
 - ▲ For broilers, layers and turkeys
-

Success happens when you make fractional changes that assist in driving positive results. We deliver exact combinations to help you expand your animals' performance potential.

The perfect blend delivers powerful results.

A lot can influence a bird's health and performance. Vaccinations, environmental changes and stress can all negatively impact the digestive system and intestinal lining. A multi-component solution provides the support you need to help ensure it all goes right, even with so many variables.

Multiple components expand what's possible

Beacon® feed additive contains a select combination of prebiotics, probiotics, plant extracts and butyric acid. When combined, these four ingredients deliver optimized support compared to feeding individual ingredients separately.

Prebiotic yeast extracts support gut integrity. Probiotics help support beneficial microbial populations. Plant extracts stimulate the secretion of enzymes to optimize digestion, and butyric acid supports metabolism and gut integrity. Together, these ingredients support the immune system through optimal gut function and integrity of the intestinal wall.

Multi-component feed additives also support efficiency in feed manufacturing and mixing. They can reduce the total number of products you need to store in the feed mill. They can also help manage the cost of bag disposal, save time unloading trucks and moving products, and simplify product ordering.

Beacon® feed additive delivers multi-component support
