

# MAXIMIZE FORAGE DIETS WITH CELLULO-GEST® FEED ADDITIVE

Forage is the foundation of cattle feeding programs, but some starches and fibers are not always converted to available nutrients. Cellulo-Gest® feed additive contains a specific combination of enzymes to target multiple forms of fiber and aid in impacting starch utilization. Cellulo-Gest® feed additive helps break open these tough feed components so cattle can access the energy within.

---

## 3 THINGS TO KNOW ABOUT CELLULO-GEST® FEED ADDITIVE

- ▲ Helps optimize fiber digestibility and starch utilization
- ▲ Broad spectrum of enzymes
- ▲ Supports growth performance

---

Success happens when you make fractional changes that assist in driving positive results. We deliver exact combinations to help you expand your animals' performance potential.

## Cattle can't digest everything.

Optimizing forage utilization can be the key to driving performance. When feed quality is less than ideal, a portion of the nutrients can be locked up in non-digestible fibers. In the case of high-starch diets, some starches pass through cattle and are wasted in manure. The correct combination of enzymes can help unlock the nutrients from feeds to make them available for performance optimization.

### Expand what's possible with optimal starch and fiber digestion

Factors impacting feed digestibility include feed quality, protein and energy supplementation and completeness of feed fermentation. Cellulo-Gest® feed additive is a uniquely blended enzyme supplement designed to aid digestion of the forage components cattle cannot digest, including cellulose and hemicellulose, and turn them into nutrients cattle can use. It contains enzymes from multiple sources to target multiple forms of fiber and starch.

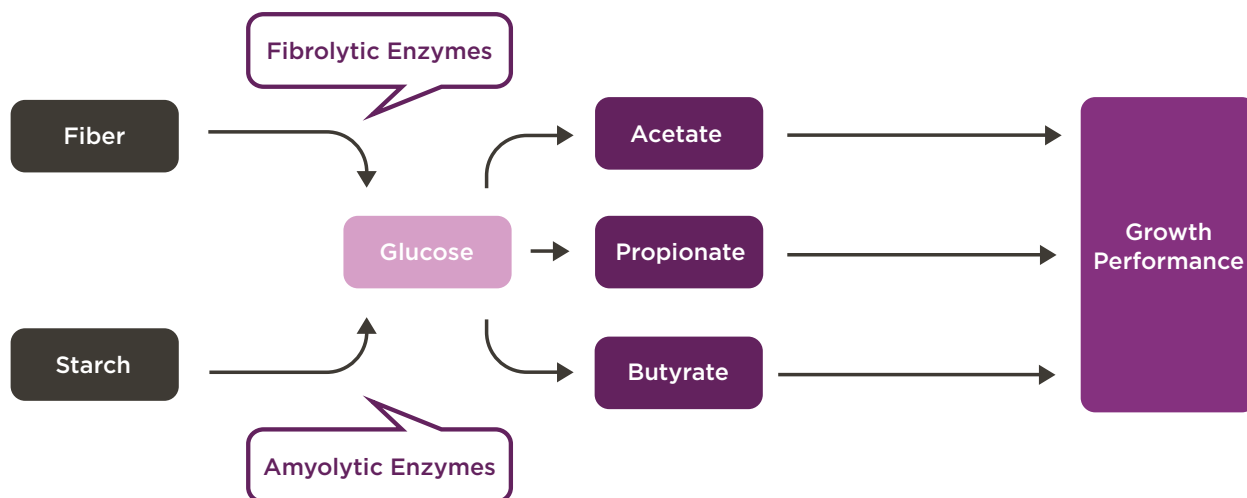

Optimal fiber digestibility supports dry matter intake, energy absorption, and production of acetate, butyrate and propionate for optimal cattle growth.

### Cellulo-Gest® feed additive delivers results

Research trial results demonstrate that, on average compared to cattle in the control group, cattle fed Cellulo-Gest® feed additive experienced<sup>1</sup>:

- Higher average daily gain
- Improved feed efficiency

### Cellulo-Gest® feed additive delivers multi-component support
