

# REDEFINE PRODUCTIVITY WITH PELTON® YEAST FEED ADDITIVE

Peloton® Yeast feed additive helps cows get the most out of their feed by supporting an ideal environment for beneficial rumen bacteria. It contains *Saccharomyces cerevisiae* live active yeast and Fulfill® feed additive, a source of active ingredients from yeast cell walls.

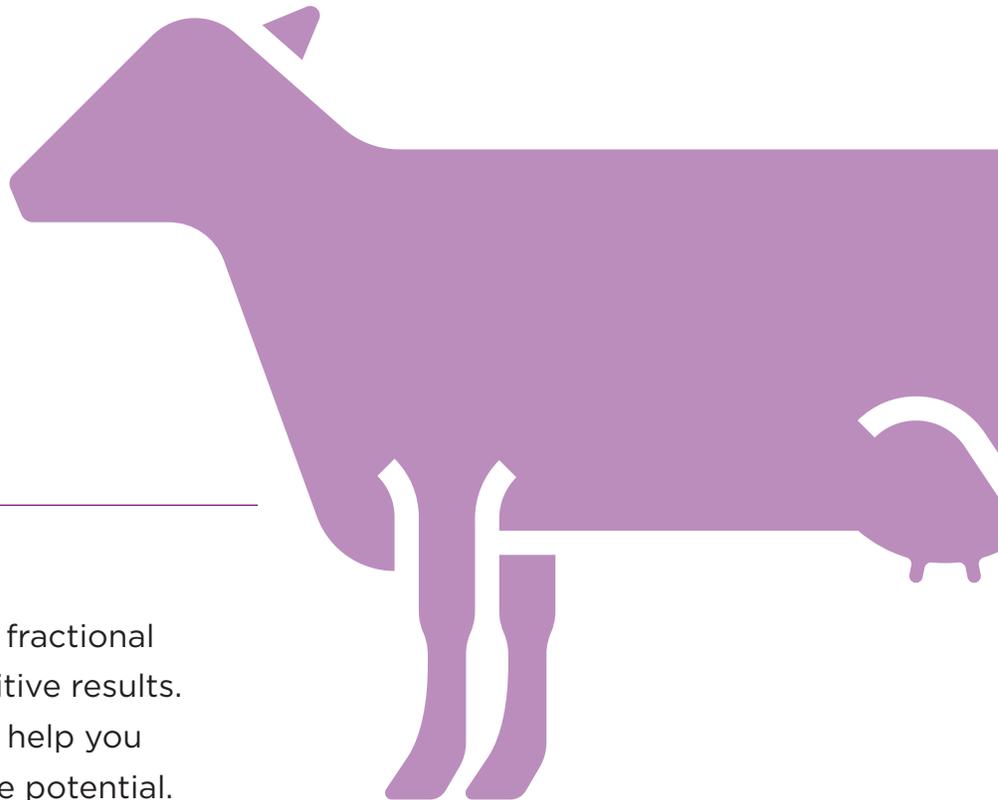

---

## 3 THINGS TO KNOW ABOUT PELTON® YEAST FEED ADDITIVE

- ▲ Helps optimize fermentation in the rumen
- ▲ Assists with fiber digestion
- ▲ Supports feed efficiency

---

Success happens when you make fractional changes that assist in driving positive results. We deliver exact combinations to help you expand your animals' performance potential.

## The microbiome helps define dairy productivity.

Live yeast supports microbial function to help raise the bar on performance potential. How?

It consumes lactic acid and oxygen, which are toxic to beneficial bacteria in the rumen.

The fermentation activity of live yeast feeds the “good rumen bugs” with vitamins, organic acids and amino acids.<sup>1</sup> It also supports fermentation to optimize feed efficiency.

### Expand what's possible

A single ingredient isn't enough to balance the impacts of weather, lactation stage, changes in feed quality and more. Your cows need multi-dimensional nutrition to respond to the complex factors impacting milk production. That's why Peloton® Yeast feed additive contains Fulfill® feed additive, a source of active ingredients from the yeast cell wall.

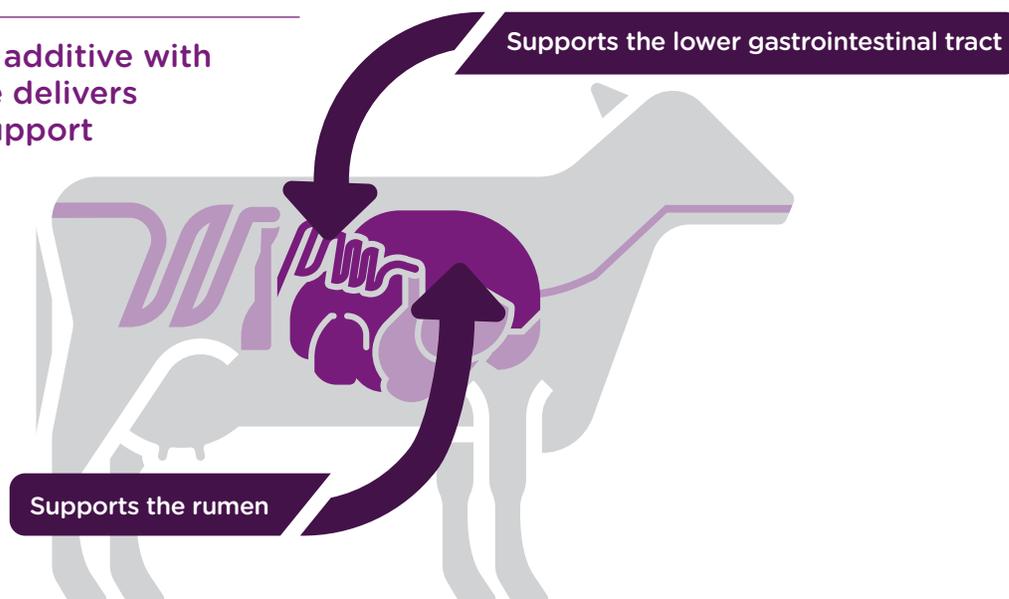

The *Saccharomyces cerevisiae* in Peloton® Yeast feed additive supports rumen function, while the active ingredients in Fulfill® feed additive continue to the lower gastrointestinal tract to further support gut health and immunocompetence, helping your cows make the most milk from their feed.

### Yeast makes a difference

Cows fed *Saccharomyces cerevisiae* yeast<sup>2</sup> before and during an acidosis challenge experienced optimal:

- Dry matter intake
- Fat-corrected milk yield
- Ruminal pH
- Rumen microbes and fungi

**Peloton® Yeast feed additive with Fulfill® feed additive delivers multi-component support**
