

DOMINNATE™ FEED ADDITIVE

Medium-chain fatty acids (MCFAs) are not all the same. The MCFAs in Dominnate™ feed additive are immediately functional and require no further steps for activation. They work quickly to support pig performance and biosecurity in pork production.

3 THINGS TO KNOW ABOUT DOMINNATE™ FEED ADDITIVE

- ▲ Blend of carefully researched and activated MCFAs
 - ▲ Supports pig performance
 - ▲ Tool to support biosecurity management
-

Success happens when you make fractional changes that assist in driving positive results. We deliver exact combinations to help you expand your animals' performance potential.

Actively support your protocols.

Challenges and opportunities evolve quickly in the pork industry, and you need to adapt. The right combination of activated medium-chain fatty acids can be a powerful tool. Other common forms, such as salts or triglycerides, must be activated by chemical reactions before they can deliver potential benefits.

Activated MCFAs such as those in Dominnate™ feed additive are functional immediately.

Dominnate™ feed additive expands what's possible

Dominnate™ feed additive contains a blend of carefully researched, activated medium-chain fatty acids. The exact combination, as well as the activated form, differentiate Dominnate™ feed additive from other MCFA-based feed additives. Dominnate™ feed additive is one tool you can use to support your operation's biosecurity protocols.

Dominnate™ feed additive delivers results

Data from a 2019 trial indicated pigs fed Dominnate™ feed additive, on average, experienced optimal performance compared to pigs fed control diets.¹

Impact of Dominnate™ feed additive on pig performance in a challenge study^{1,2}

	Gain
	ADG, lb./d
Control ³	0.93 ^b
Dominnate™ feed additive ⁴	1.56 ^a

¹Dee et al., 2019.

²Inoculated feed was delivered by auger to pens for 15 days (n=6 pens/trt).

³Control = complete feed with no feed additive.

⁴0.8% Dominnate™ feed additive inclusion equivalent.

^{ab} Means with differing superscripts within column differ (P < 0.05).
